

## Mayoral Elections Scheduled for 2005

*\*Some primaries require a candidate to receive more than 50% of the vote to prevent a runoff in the general election. Nonetheless, cities still may or may not choose to proceed with the general election even though a winner has been decided in the primary. Also included are cities that choose their mayor from within the city council where a general election for the position of mayor does not occur but where a potential change in mayor is anticipated.*
